PROFESSIONAL SUMMARY

I design digital products for real people, turning ambiguity into clear, useful experiences.

I've worked across SaaS, e-commerce, digital publishing, and enterprise products for companies including Serko, Booking.com for Business, Tesco, Virgin Trains, and NatWest. Across those roles, I've focused on innovation, improving adoption and trust, and lifting product performance by solving the points where users struggle most.

My work spans the full UX/Product design cycle, from discovery and problem framing through workshop facilitation, prototyping, testing, and iterative delivery with product and engineering teams.

WORK EXPERIENCE

Lead Product Designer

Serko // Remote // 2022 - Jan, 2026

- **Zeno Travel, Zeno Expense, GetThere:** Led a design team to deliver enterprise product improvements across corporate travel and expense platforms, combining user research, data analysis, and cross-functional collaboration (Product, Engineering, and stakeholders) to prioritise and ship measurable enhancements.
- **Booking.com for Business:** Led cross-functional redesigns of signup and booking journeys, using insight-led iteration and experimentation to improve acquisition and activation outcomes: +20% overall acquisition, +160% mobile acquisition, and +9% activation.

Senior Product Designer

Serko // Auckland // 2020 - 2022

Senior User Experience Consultant

Inviqa // London // 2020 - 2020

Collaborated across product, engineering, and stakeholder teams to deliver user-centred improvements that balanced user needs, business outcomes, usability, and accessibility across digital platforms.

- **Tesco:** Led UX redesigns of buyer workflows to streamline product distribution decisions and reduce operational friction in a complex enterprise environment.
- **Virgin Trains:** Delivered research-led and A/B tested UX/UI improvements that generated over £1.14M in annual revenue uplift.
- **British Standards Institute:** Delivered a comprehensive global website redesign through end-to-end UX process, from discovery and structure through to final design execution.
- **RBS/Natwest:** Prototyped and tested an AI-powered concept to help customers better understand service terms and make more informed decisions.
- **Diligent:** Improved UX across governance software used by complex corporate clients, making key workflows clearer and easier to navigate.

UX/UI Designer

Webcredible/Inviqa // London // 2017 - 2020

Senior Digital Designer & Frontend Developer

ICG // Auckland // 2011 - 2016

Designed and built front-end experiences for internal publishing platforms and client marketing/e-commerce sites, working closely with developers to deliver production-ready outcomes.

- **Tangible Media:** Designed a subscription-focused website to increase digital content engagement across magazine brands.
- **Dish Magazine:** Designed a flexible transition from print content to online, including paywalled recipe features that improved digital access and content value.
- **Goodman Fielder:** Designed an iPad app for customised digital catalogues, improving sales rep efficiency in the field.
- **Home Direct:** Developed an intuitive e-commerce experience that simplified complex multi-payment options for customers.
- **Eurotech:** Built a wholesale-focused online catalogue that improved product discoverability and navigation.

Interaction Designer

DNA // Auckland // 2010 - 2011

- **BNZ:** Designed a range of collateral to implement the new branding into client communications.
- **Spark:** Created an in-store touch-screen experience that improved customer interaction and self-service engagement.
- **Sanitarium:** Developed visual moodboards and prototypes to support cereal product design research and concept evaluation.
- **AMP:** Designed an insurance cover tool that simplified customer decision-making and improved comprehension of options.

Digital Designer

HB Media // Auckland // 2009 - 2010

Supported website design and development for publishing platforms, improving content accessibility and overall user experience.
